450,000 US\$ to 620,000 US\$

► MODULAR SOLUTIONS. We have many options to personalise our designs to the customer's requirements. Because there is no need for a mould, every model can be different thanks to our designer in naval architecture. All wishes can be conceptualised and comply with the relevant ISO and CE standards.

► WAWA ABA "seed of the WAWA tree" Symbols of hardiness, toughness and perseverance the seed of the Wawa tree is extremely hard just like our creations. In Akan culture, it is a symbol of someone who is strong and tough. It inspires the individual to persevere through hardship.

History of WAWA Creations

- ▶ 2020 Claude & Peter dream about EcoFriendly Boating.
- ▶ 2021 The first WAWA Rescue Boat was built to the benefit of Disabled Sailing Thailand.
- ▶ 2022 We have already sold tens of boats in Thailand and open new boatyards in Sri Lanka and Singapore.

Candidate profile

- ▶ Management experience
- ▶ Experience in economic and financial management
- ▶ Professional skills or degree
- ▶ Facilitation Skills
- ▶ Knowledge of the local economic and social fabric
- ▶ Business trade
- ▶ Customer satisfaction

Do you have the profile to join WAWA Creations?

- ▶ Manager
- ▶ Technician capacity
- ▶ Network in the local nautical economic

Training & support

- ▶ Technical training, need to start with at least one experienced technician
- ▶ Start-up business training
- ▶ Administrative training to launch the activity
- ▶ Training support during the start-up period
- ▶ Commercial support with key national accounts
- ▶ ISO & CE Shipyard Certifications
- ▶ Raw Material Management

▶ The future subscriber will follow two weeks of training course at WAWA Creations Thailand (Asian region) or New Caledonia (Pacific region) boatyards. During this period, he will discover the technical methods of our brand which are our strength but also our customer approach and daily follow-up. It is a real both immersion to technical and practical training. The new team will learn the basics of a commercial approach (what to sell and to whom). On the practical side, it is a question of going to the field to meet prospects and discover together the key messages to transmit to each type of potential customer.

The Toughest Workboat for Professionals

Boating should be safe and ecofriendly.

- ▶ Commercial boats have to be 100% reliable in all sorts of rough conditions. Whether you're manoeuvring in shallow waters or turbulent sea. Whether you're piloting, diving, patrolling, surveying or have a fun time. Your boat needs to be safe and durable!
- ▶ Why do we only work with HDPE? Because it's light and ecofriendly (100% recyclable). The major problem in the boat industry is the recycling and using HDPE lower the carbon footprint 5 times compared to aluminium.
- ▶ The old GRP is very easily damaged as are the rubber RIB tubes. One rock, one bump onto the shore and it's game over. Not with HDPE ; a product unlike any other boat building material. It's lighter than water, durable with lifespan estimated at 50 years, inert without any acid effects on the surface and mainly because it's indestructible.
- ▶ Low maintenance
- ▶ No anti-fouling required
- ▶ Virtually unsinkable
- ▶ Extremely strong
- ▶ Cost effective
- ▶ 100% recyclable
- ▶ Non-conductor
- ▶ Sound dampening
- ▶ Fuel efficient

▶ HDPE is an extremely strong material ; you can hit it with a sledge hammer nothing will happen.

▶ HDPE is 100% recyclable, combined with a solar electric propulsion it makes it an ideal tool for the eco-resort and national park.

▶ HDPE has not only a very superior tensile strength but the material as well has a high buoyancy. This makes it one of the safest boat building materials.
